## CHEMISTRY

The Benedictine College Department of Chemistry and Biochemistry is accredited by the American Chemical Society to develop students' foundations in the chemical sciences that are integral to many disciplines in today's high-technology society. Successful completion of a chemistry or biochemistry degree prepares students for entry into many different fields including medicine, dentistry, pharmacy, materials science, medicinal chemistry, synthesis, environmental, forensics, drug discovery, biotechnology, molecular biology, and research.

## Programs

## Bachelor

- Biochemistry (BA)
- Biochemistry (BS)
- Chemistry (BA)
- Chemistry (BS)
- Chemistry for Prospective High School Teachers (BA)

## Minor

- Chemistry Minor
